The Appellant considers that the decision of the Planning Committee to disregard the Planning Officer's clear recommendation in their Officer's Report to grant planning permission and, instead refuse the planning permissions has resulted in unsatisfactory reasons for refusal.						
The sole reason for refusal relates to visual impact upon the site and its surroundings as well as impact upon the wider rural character of the area. This is following Officer's recommendation that the content and conclusions reached in the Appellant's Landscape and Visual Impact Assessment (LVIA) were acceptable.						
There is an urgent need for the deployment of BESS facilities, such as that which is proposed as part the Appeal Proposals, to drive the transition to low carbon renewable energy generation in order to tackle the declared climate crisis. The urgent need for renewable energy seeks to make a contribution to the policy confirmed Net Zero Target of 2050.						
The Appeal Proposals comprise a Major Development. The Site's ability to provide up to 49.9 megawatts ('MW') of renewable energy within the South Staffordshire district. The Appeal Proposals, in terms of it's ability to provide a significant amount of energy storage capacity, would make a significant contribution to energy security and the National Government's climate change objectives.
